Holy Redeemer is a founding member of the Temple Heart Network, a regional partnership of leading cardiac specialists from Holy Redeemer Health System, Montgomery Hospital Medical Center, and Temple University Health System, including Jeanes Hospital.

The Cardiovascular Center at Holy Redeemer

LOOK NO FURTHER

Enhancements to our Cardiovascular Center enable Holy Redeemer's experienced team of cardiologists, interventional radiologists, vascular surgeons, nurses and technologists to provide state-of-the-art care and deliver the best outcomes possible for patients with complex cardiovascular conditions, from blocked coronary arteries to deep vein thrombosis.

And as a member of the *Temple Heart Network*, our Cardiovascular Center is backed by the collaborative resources and facilities of an academic medical center nationally recognized for advanced cardiac care.

ABOUT HOLY REDEEMER HEALTH SYSTEM

With an emphasis on providing a continuum of care, Holy Redeemer Health System remains true to the mission to care, comfort and heal that its sponsors, the Sisters of the Holy Redeemer, began in our region in 1924 – to provide high quality, compassionate care.

Today, Holy Redeemer offers a wide range of healthcare and health-related services, including an acute care hospital, home health and hospice services, two skilled nursing facilities, assisted living, a retirement community, low-income housing, an active living community, and a transitional housing program for homeless women and children.

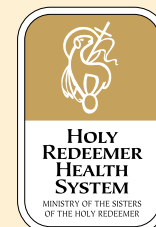

With corporate offices in Huntingdon Valley, PA, Holy Redeemer Health System is a Catholic healthcare provider, serving southeastern Pennsylvania and 11 counties in New Jersey, from Union County south to Cape May County.

CONTACT US

The Cardiovascular Center is located on the second floor of Holy Redeemer Hospital & Medical Center. Most forms of insurance are accepted.

Advanced Technology
Clinical Expertise
Compassionate Care

The Cardiovascular Center at Holy Redeemer offers the most sophisticated equipment available for diagnosing and treating cardiac and peripheral vascular (blood vessel) conditions. Our outstanding multidisciplinary team of heart and vascular specialists is highly experienced in delivering advanced life- and limb-saving procedures such as angioplasty – to clear clogged arteries in the heart or legs – and stent placement to keep the vessels open.

A FULLSPECTRUM OF CARE

Our newly renovated facility includes three interventional procedure rooms and nine private prep/recovery rooms for patients undergoing cardiac or peripheral interventional procedures.

The Center and its staff are equipped to address a broad spectrum of cardiovascular conditions including:

- Coronary artery disease (narrowing of the arteries)
- Cardiac arrhythmia (irregular heartbeat)
- Hypertension (high blood pressure)
- Heart failure
- Stroke (vascular injury to brain)
- Aortic aneurysm (weakened vessel)
- Deep vein thrombosis (blood clots)
- Peripheral vascular disease (clogged arteries in legs or arms)
- Carotid artery stenosis (constriction of blood flow to head/neck)
- Varicose veins (enlarged, knotted veins)

Our new state-of-the-art digital imaging system provides exceptionally precise X-ray images, but with only half the radiation exposure of older systems. The digital format enables physicians to obtain results immediately.

OPEN FOR EMERGENCY TREATMENT

ADVANCED TECHNOLOGY & EXPERTISE

A complete range of diagnostic and therapeutic services is available at the Cardiovascular Center including stress testing, echocardiography and advanced digital imaging of cardiac and peripheral blood vessels. Our physicians have performed hundreds of lifesaving angioplasty and stent procedures to clear blocked arteries and perform the latest minimally invasive procedures, including:

- Angioplasty to remove arterial blockages nonsurgically
- Drug-coated stent placement to keep vessels open
- Thrombolytic (clot-busting) drug therapy
- Electrical cardioversion to treat arrhythmia
- Thrombectomy to remove blood clots
- Stent graft to repair an aneurysm
- Endovenous laser treatment to treat varicose veins

The advantage of these nonsurgical interventions is that risk, pain and recovery time are reduced. No general anesthesia is required and hospital stays are shorter than with surgery. In some cases, these procedures can be performed on an outpatient basis.

Open for emergency treatment around-the-clock, the Cardiovascular Center is located near our Intensive Care Unit and Emergency Department for when minutes count.

And should a patient require open-heart surgery, transport from Holy Redeemer to a nationally recognized academic medical center is on standby around the clock through the Temple Heart Network.

ADDITIONAL CARDIAC PROGRAMS AND SERVICES

- **Holy Redeemer Home Care** – highly skilled home health nurses and aides with expertise in cardiac care, should you need extra care or rehabilitation at home
- **Community education programs** on nutrition, diabetes, weight loss and other heart and vascular health topics.
